WHOLE ROUTE

Route 17 Trip-Scope Planner

Choose the size of the trip before you choose the stops.

USE THIS FOR

Decide whether you are building a one-state day, a two-state handoff, a multi-day corridor trip, or the full five-state route.

LIVE GUIDE <https://route17roadtrip.com/trips/>

Florida > Georgia > South Carolina > North Carolina > Virginia

Planning aid only - verify current weather, construction, closures, operating hours, lodging, fuel, parking, and access before driving.

LIVE GUIDE

TRIP SCOPE

Pick the trip shape first

The route is more useful when the travel scope controls the stop count, not the other way around.

ONE-STATE DAY Chapter focus Choose one state and one or two anchor roles.	TWO-STATE HANDOFF Transition focus Use a canonical trip or segment to manage the state-line change.
MULTI-STATE CORRIDOR Pacing focus Protect overnights and keep support stops selective.	FULL ROUTE 17 Five-state roadbook Use the state sequence to set a multi-day rhythm before filling details.

Scope questions

- [] What is the real finish point?
- [] Which state or city is the main reason for the trip?
- [] How many major anchors can the day support without rushing?
- [] Where is the first realistic overnight/reset?
- [] What will be cut first if the day runs long?

TRIP SCOPE

Pace and overnight posture

Use the route roles to keep the schedule from becoming a mileage-only plan.

7				

Overnight rule

Choose an overnight because it improves the next chapter, not simply because it is the furthest point you can reach.

TRIP SCOPE

Blank route plan

Leave room for the trip to change. The best backup plan is already written before the day gets complicated.

Direction	
States in scope	
Must-do anchor	
Preferred overnight(s)	
Backup overnight	
One optional detour	
Cut-first rule	
Weather / road checks
